Passionate CyberSecurity Enthusiast with an extensive home lab. Obsessed Technology professional with 5+ years of experience providing IT Support and troubleshooting and 2+ years of experience with Security Fundamentals, Linux, Python, Offensive Tools, Web Development and Exploitation. Skilled in delivering Customer Service and reports, addicted to researching Security and Privacy solutions.

Threat Hunting / Security Analyst Experience

Purple Team (Offense/Defense) Hacking Lab

- Built a Kali Linux virtual Penetration Testing lab using VMware Player to scan systems, networks and websites/apps for vulnerabilities and test various types of exploits and attacks.
- Deployed many various VMs as targets to practice exploiting Windows, Linux and other OS.
- Configured multiple VMs and Cloud servers with IDS, IPS, Analysis, Firewall and SIEM tools including Wireshark, Snort, Wazuh, Suricata and Splunk in order to detect, log, prevent and practice Incident Response and emulate SOC with multiple forms of threats and attacks.

TryHackMe / OverTheWire / picoCTF / VulnHub

- Successfully completed dozens of labs and CTFs / Wargames practicing Information Security, Web App Security, Network Security, Windows & Linux Security and Privilege Escalation.
